

Position: **Electronics Test Technician**

Company Name: Marlin Technologies, Inc.

Salary: \$23-\$28/hour depending on experience. This is an hourly/non-exempt position

Hours: 6AM and 3:30PM Monday-Thursday, 6AM-10AM Friday. Occasional overtime possible.

Job Overview:

Marlin Technologies, located in Horicon Wisconsin is seeking an Electronic Test Technician to join our team! Marlin Technologies is a growing, fast paced leader in custom electronic controls for OEM's. We offer challenging and rewarding employment in the fast-growing electronics industry. The right candidate will be motivated to learn and will be responsible for many aspects of electronic testing in our circuit board manufacturing facility. Marlin offers a full range of benefits to our full time employees, including paid time off, Health/Dental/Vision/Disability/Life insurance, and a company matching 401K.

Responsibilities: (You will be doing...)

- Participate in the production test process.
- Interpret technical engineering documents, such as schematics, electronic drawings and test plans.
- Setup and operate complex test equipment to ensure compliance with industry standards.
- Assist with tasks related to new product development (product rework, repair or modification).
- Provide guidance to production personnel to resolve technical issues.
- Build test harnesses and setups per instructions/schematics.
- Perform testing, troubleshooting and repair of electronic systems.

Qualifications: (You must have....)

- Associate degree in Electrical Engineering / Electronics Technology or equivalent.
- 1-year experience using Labview software, preferred.
- IPC-A-610 Certification, preferred.
- Effective problem-solving skills.
- Ability to set up and operate test equipment, including a computer-based test system.
- Aptitude for working with the tools and equipment common to the testing area.
- Strong communication skills, both verbal and written.
- Ability to consistently meet project deadlines.

- Proficient at soldering surface mount and through-hole components.
- Must be able to interpret test documentation and implement an automated test program to complete the testing process.
- Applicants must be US Citizens
