

CONSIDER A CAREER AT MARLIN TECHNOLOGIES

THE PROBLEM SOLVERS
FOR ELECTRONIC CONTROL

ANY CHALLENGE. ANYWHERE. MARLIN TECHNOLOGIES IS READY.

Marlin Technologies designs, engineers and delivers custom electronic control solutions for OEMs. Our expertise is in severe duty applications — harsh environment markets such as Agriculture, Construction, Marine and Defense — which require products that are designed and rigorously tested to withstand extreme temperatures and other environmental factors while delivering superior performance.

Marlin Technologies is an established company that is growing quickly as a proven leader creating custom mobile electronic controls and devices that enable OEMs' products to stand out in their markets.

NOW RECRUITING ENGINEERS.

Here, you can put your analytical mind and your mathematics, science and physics training into action every day. Bring your enthusiasm, communication skills, teamwork and problem-solving savvy. We'll provide plenty of opportunity to find imaginative and creative solutions to problems — designing, developing, testing and overseeing production and installation of electrical controls for a wide array of severe duty applications.

At Marlin Technologies we recognize that our success is propelled by the united effort of our employees, and therefore, employees are rewarded accordingly.

Contact us about employment and internship opportunities.
